About NewLink Genetics Corporation

NewLink Genetics is a clinical stage biopharmaceutical company focusing on developing novel oncology product candidates to improve the lives of patients with cancer. NewLink Genetics' IDO pathway inhibitors, indoximod and its prodrug, NLG802, are immuno-oncology drug candidates designed to harness multiple components of the immune system to combat cancer. NewLink Genetics' drug candidate, NLG207 (formerly CRLX101), a nanoparticle formulation of topoisomerase 1 inhibitor, camptothecin, is under development to combat refractory malignancies. For more information, please visit www.NewLinkGenetics.com and follow us on Twitter [@NLNKGenetics](#).
